

**Department of mechanical engineering**  
**Government engineering college Dahod**

**NOTICE**

All the students of B.E. Semester 5<sup>th</sup> are hereby informed to remain present at Main Gate of New Janta Metal Works, Beside Dahod Rural Police Station Dahod-Godhra Highway Road, Rabdal, Dahod at 14.00 P.M. on date 29-08-2024 (Thursday) for the industrial visit purpose at the same place. **Students are informed to remain present with shoes, declaration form in two copies (if not submitted previously) and college I-card or aadhar card in hard copy.**

New Janta Metal Works, a leading manufacturer of cast iron vertically casted double flanged pipes and fittings was established in 1953 by Mr. Z.M. Parawala. They have already taken over the challenges to produce sound casting with consistent quality with new technique i.e. vertical mode of casting and leads to meets the concept of our company to yield "ZERO DEFECT" products. Vertical casting technique gives zero inclusion, uniform grain structure, controlled & desired microstructure and because of uniform cooling rate during solidification castings bear very good hydraulic strengths. This way guarantee products having zero defects with consistent quality. They are manufacturing pipes and fittings in nominal bore size from 25 NB to 1000 NB.

Students are informed to follow rules of industrial safety and discipline during visit.
